<u>Acknowledgment</u>

We would like to express our special thanks to Purbanchal University School of Science and Technology to give us a golden opportunity to present our project Quiz game in "C"

Though perseverance and enthusiasm combined with effort in the right direction can bring forth the thing called success. But the realization of the harsh reality that the path towards success is full of my raids, temptations, impediments and pitfalls often proves to be disheartening in such a situation, it is the able guidance of a knowledgeable person that steers one through difficulties and help him achieve success.

I am highly obliged to express our deep sense of gratitude and grateful thanks to my erudite guide **Mr. Gopal Prasad Sharma** for his valuable guidance and support which led to the successful and timely completion of my project report.

I am secondly very thankful to our H.O.D Dept. of Science & Technology for his valuable suggestions & guidance.

Finally, we would also like to thank our friends, seniors, and especially our parents who helped us complete our project within the limited time.

Abstract

Nowadays, Quiz play is one of the most popular gameplay for gaming sectors. This is a special made-of-play game quiz of computer project "Quiz game in C" essential tools that are mostly used in online gameplay and different institutions but we try to make try first in C programming in our 1year/1st semester study in BCA . It is mainly used to bits of help to give knowledge and also helps to use our knowledge to make money.

In this project, we tried to develop a computerized system to calculate with given operands. Our main goal is to allow the application to be used in most of the online gaming and for knowledge to personal & professional use.
